S. P. Nanda	1 Brain injury due to an input angular acceleration of the head—an analytical study
A. Prasad and A. K. Das	7 Thermal response due to continuous cooling in a thermomechanical treatment process
Y. Lin and Y. H. Ma	19 System hierarchies with continuous linkage mappings
F. A. Howes	27 The response of a turbulent boundary layer to a small-amplitude travelling wave
M. Zak	33 Hydrodynamic stability and frames of reference
N. Rishe and M. Lipkind	39 Modelling of virus interrelationships for computer analysis of inhibition data
E. Comparini and R. Ricci	49 A free boundary problem in acrosomal elongation
S. Parthasarathy	55 Is there a relation between sequential control and continuous control?
T. A. Edmunds and J. F. Bard	61 A decomposition technique for discrete time optimal control problems with an application to water resources management
R. B. Leipnik	79 Consumer buying dynamics for a single commodity using flow and stock utilities and a principle of minimum total utility imbalance
I. Kramer, J. A. Yorke and E. D. Yorke	99 Modeling non-monogamous heterosexual transmission of AIDS
V. Comincioli and G. Naldi	109 Mathematical models in muscle contraction: parallelism in the numerical approach
Y. Yavin	117 A pursuit-evasion problem where the pursuer is in its coasting phase
P. M. Rao	127 Mathematical model for the propulsion of a ciliated micro-organism with differential spin
	137 Books Received
	I Software Survey Section
	A Rigorous Heterogeneous Model for the Design, Simulation and Optimization of Industrial Ammonia Converters, by S. S. E. H. Elnashaie and F. M. Alhabdan; "StS-Analysis"-Specialized Interactive Program Product for Researching Stochastic Systems on IBM PC/XT/AT, by V. X. Pugachev <i>et al.</i> ; FORWARD - FORTRAN Static Analyzer, by J. R. B. Davies

Proceedings of the International Workshop on The Population Dynamics of Outbreaks

P. L. Antonelli

vii Foreword

R. J. Elliott

1 Filtering for a logistic equation

P. L. Antonelli

11 Medawar's growth energy experiment, revisited: along a Brownian path

P. L. Antonelli

19 A brief introduction to Volterra-Hamilton theory in ecological modelling

P.L. Antonelli

25 An easy statistical test for Volterra-Hamilton systems with date

D. S. Mulyk

31 Allelochemically-based interspecific interactions

P. L. Antonelli and X. Lin

35 Bifurcation analysis on a coral-starfish model

R. E. Reichelt,
R. H. Bradbury and
P. J. Moran

45 The crown-of-thorns starfish, *Acanthaster planci*, on the Great Barrier Reef

R. H. Bradbury,
J. D. van der Laan and
B. Macdonald

61 Modelling the effects of predation and dispersal on the generation of waves of starfish outbreaks

D. G. Green

69 Cellular automata models in biology

D. G. Green

75 Landscapes, cataclysms and population explosions

P. Hogeweg and B. Hesper

83 Individual-oriented modelling in ecology

J. B. Collings and
D. J. Wollkind

91 Metastability, hysteresis and outbreaks in a temperature-dependent model for a mite predator-prey interaction

A. A. Berryman

105 Identification of outbreak classes

PROCEEDINGS OF THE WORKSHOP ON BUSHFIRES: METEOROLOGY AND DYNAMICS

T. Beer	vii	Foreword
	1.	INTRODUCTION
C. M. Purton	1	Is bushfire modelling a science? Impressions from recent legal cases involving bushfire damage
N. P. Cheney	9	Quantifying bushfires
M. E. Alexander and D. Quintilio	17	Perspectives on experimental fires in Canadian forestry research
	2.	COMPUTER MODELS
N. J. H. Gellie	27	Improving models with PREPLAN—a description of the current system and what is needed
R. H. D. McRae	37	Use of digital terrain data for calculating fire rates of spread with the PREPLAN computer system
T. Beer	49	The Australian National Bushfire Model Project
D. G. Green, A. Tridgell and A. M. Gill	57	Interactive simulation of bushfires in heterogeneous fuels
I. A. French, D. H. Anderson and A. Catchpole	67	Graphical simulation of bushfire spread
	3.	EMPIRICAL AND ANALYTICAL MODELS
R. Hosking	73	Grassland curing index—a district model that allows forecasting of curing

P. G. Baines

83 Physical mechanisms for the propagation of surface fires

R. O. Weber

95 A model for fire propagation in arrays

4. METEOROLOGY

R. A. D. Byron-Scott

103 The effects of ridge-top and lee-slope fires upon rotor motions in the lee of a steep ridge

M. R. Raupach

113 Similarity analysis of the interaction of bushfire plumes with ambient winds
